

HUMAN TISSUE DONATION

Tissues retrieved

JÉRÉMIE
HEART-VALVE
RECIPIENT

Each opportunity to recommend a potential donor is invaluable, as the needs are great.

A corneal transplant can restore the sight of a visually impaired person.

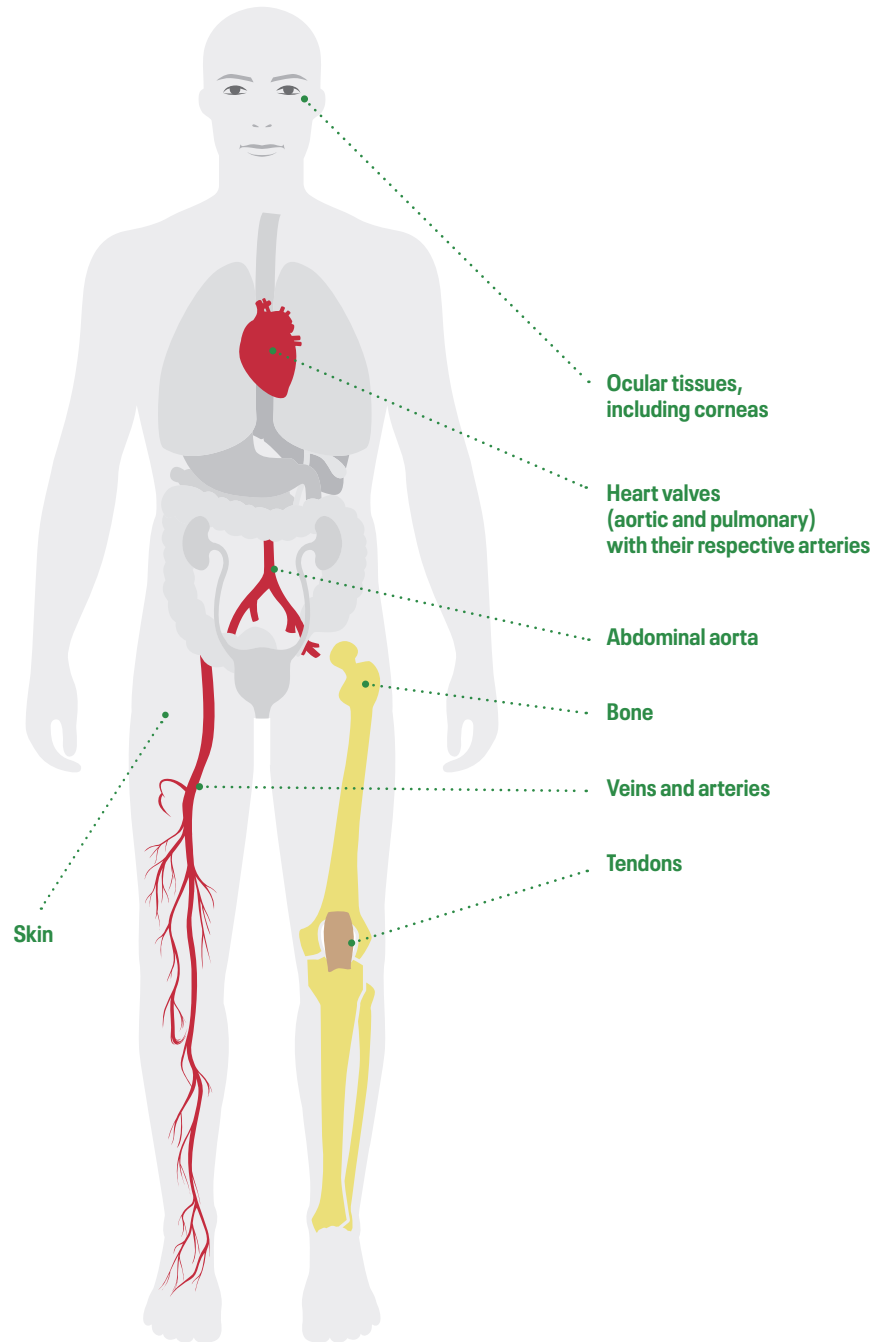

A skin graft can help save the life of severe burn victims.

A heart valve donation can help a diseased heart function normally again.

A donation of bone and tendons makes reconstructive surgery possible.

Nearly 50% of people who die in hospitals can become human tissue donors
